KW: USellCorp, USell Corp, U Sell Corp

It has been brought to my attention that you are the owner of a website who has and is still defaming our companies, policies and reputation.

Your remarks on your website are malicious and completely false. First of all you never signed up with our company, and now that you claim that you have, you would have had to agree to the terms in our agreement, which now we are going to hold you to it.
<https://www.phinc.biz/agreement.htm>

Secondly we have not a \$1250.00 setup fee for any website we sell, we have charged \$1295.00 to design a website, setting up and designing a website are completely different from one another and you make it misleading for self gain.

Third, Our hosting fee is \$29.95 and not \$24.95 if you were a customer, you would have known that.

Fourth, is the most outrageous and malicious deceitful statement you have told is USellCorp has a \$2500.00 PER YEAR MAINTIENCE FEE. UsellCorp has NEVER has any such fee.

Your intent is clear, to defame USellCorp for personal monetary gain with malicious and tortuous act of deformation. We are **HEREBY** holding **YOU RESPONSIBLE** for **ALL DAMAGES** that have occurred and will occur for as long as you maintain that website.

You have done malicious and tortuous acts to bring the untrue accusations to potential USellCorp customers by maliciously using the search terms USellCorp, USell Corp, U Sell Corp trademark name as paid keyword phases to mislead USellCorp customers with great malice.

The use of these trademark words USellCorp, USell Corp, U Sell Corp, shows an absolute, and deliberate attempt into interfering with our business and is a tortuous act.

CONCLUSION:

YOU MUST DECEIST AND DESIST IMMEDIATELY and YOU MUST PUT IN ITS PLACE A COMPLETE RETRACTION.

If you FAIL to do so within 24 hours, WE WILL SUE YOU

You better think real hard.

Is USellCorp The Answer to Making Money Online?

Let me first explain who I am and why I'm writing this report! My name is James and when I was in college, I wanted to earn a little extra money on the side and hopefully grow that into a business after that! **I wanted to start making money online because many others were doing it and it seemed easy to do.** I found some information about dropshipping and thought that it could be a great way to make money because you don't have to carry any inventory and the dropshipper will ship and do all the work for you. It seemed that dropshipping could be a great way to make money on ebay.

So, I started searching for wholesale dropshippers online mainly through google searches and came up with some 'so called' dropshippers and realized that most of them were 'middlemen' and I couldn't make any money with them.

Then after hours, days, and months of searching for dropshippers, I couldn't really find any true 'wholesale dropshippers' to make money with. It became clear to me that I should try and find a service or database that already had wholesale dropshippers in their directory that I could use.

It was then where I discovered USellCorp which seemed to be the answer to all my needs! Heck, they are going to build me a website where I could dropship over 50,000 name brand products that I can make a profit with. No membership fees. It all sounded great, so I signed up.

BIG MISTAKE!!

Here are the reasons why they are not worth your time or money!!

- First of all, there is gigantic \$1,250 setup fee for your website, which I didn't have a problem with if this website really would have worked out and along with paying no membership fees as they advertised.

- Then I discovered I also have to pay a \$24.95 monthly hosting fee every month, plus the annual maintenance fee of \$2,500!! WOW!! Why didn't they explain that to me up front!!
- I could not get any support for my website whatsoever. They have a gazillion so called 'help' guides that you browse through and nothing is straight forward enough for the average guy like me to understand how all this works. I mean I just want to know how I get paid from my website when something sells!
- Basically they are well over priced by far and the service is very poor!

I want to warn anyone I can about USellCorp and I advise you to check out the other sites below which I recommend many times greater than USellCorp! But check out my reviews of other dropshippers below. I've used and tested all of these companies and have actually made money using them all!

Here's The Sites I Recommend That Will Make You Money!
